PROJECT TITLE

IMAGE FILTERATION

Different Filters on ONE image.

This Project is all about Image Filtration created using JAVA language.

Images make communication easily compare to language.

Images have more power than words.

Get the exact results you want

Our software is try to serve you best. So, we try to give exactly result as you want.

We always trying to improve ourselves so If you found any BUG then , plz inform us by contacting our email which are provided.

Amazing looks on ONE image with different colors.

Never Miss out any functionality of our software so If you are not friendly with our software so no need to worry , Because we provide you Help guide , too.

Our Future Enhancements :

We will provide you several new kind of filters , also try to reduce size of new image done using our software so our software will be memory efficient and also try to improve speed of processing.
